Subject: Thank you for your work in 2008-2010

I was doing the planning to get the family together for "dock day" next month to get the dock in at 104 Latimer Point. I thought about how difficult the permit process is and how we never would have been successful without the help of Dock (Keith, Bill, and Joan). Being able to re-use the same dock that we were forced to remove by the DEP is especially pleasing, as it was designed to overcome some of the natural obstacles (rocks, low water) and still be constructed so that we can remove it for the winter. Thank you again for your professionalism and patience with us in some trying circumstances.

Regards,

Tom Rush
